Nothing But the Facts on UFOs

0

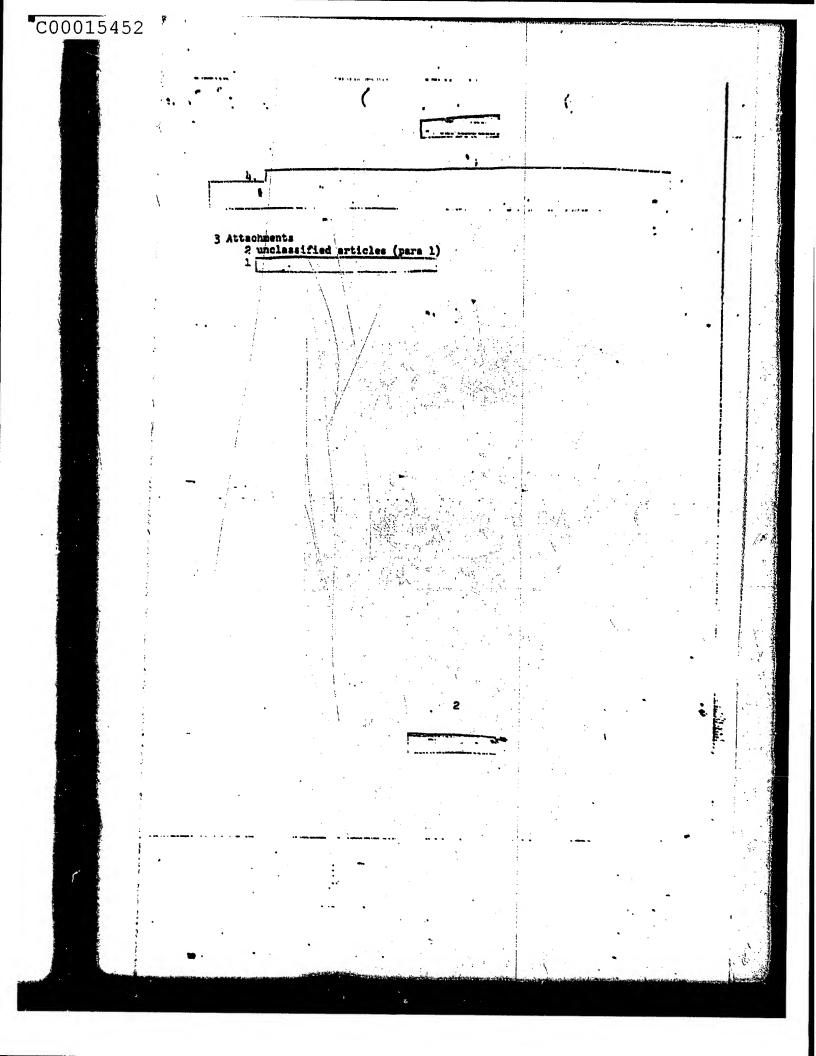

Which Novosti Writer Do You Read?

- 1. Whether you believe in unidentified flying objects (UFOs) or not, Novosti (APN -- the Soviet "unofficial" news agency) agrees with you. We are forwarding attached reproductions of two articles which argue both sides of the issue:
 - a. "Unidentified Flying Objects" by Felix Zigel, nottor of Science (Technology), Assistant Professor, Moscow Aviation Institute, appearing in the February 1968 issue of Soviet Life (counterpart to USIA's America) for which APM supplies all materials; and
 - b. "'Flying Saucers'? They're a Myth!" by Villen Lyustiberg, APN Science Commentator, which originally appeared in the 16 February 1968 issue of Moskovsky Komsomolets, and which AFN released in English translation on 12 March 1968.

The first article takes UFOs quite seriously; the second laughs them off and even claims the U.S. publicizes them to divert people from its failures and aggressions.

2. It is not surprising that two writers take opposing views on so controversial a subject, or that one adds a dollop of propagands. It is surprising to find any disagreement on any subject in Soviet media, especially in materials made available by the same agency to approximately the same readership. The irony is obvious.

"FLYING SAUCERS"? THEY'RE A MYTH!

Villen Lyustiberg; APN Science Commentator

In the last 20 years publication of literature on "unidentified flying objects" has advanced to one of the first places in the world. This problem is dealt with by numerous associations and clubs.

Are these "flying saucers" just imagination or reality?. Thousands of recorded statements by bye-witnesses seem to show that "there must be something in it". But let us try to look all these materials from a different stand. So, as the convinced supporter of the "saucer" theory say almost ever time, you can draw your own conclusion while we give you.

"Facts Only"

Kenneth Arnold, an American pilot, is the "godfather" of flying saucers. It is he who noticed in 1947 nine shining discs flying in formation at the speed of about 3,000 km an hour.

The next encounter with saucers had a tragic outcome. In January 1948, an immense flying saucer appeared over the Nox US Air Base. Pursuing it Captain Thomas Manthell perished. The last thing he reported from an altitude of 9,000 metres was that he saw an object and was going to approach it.

This story found extensive response. Many considered it to be a stern warnin; of unknown envoys from other planets to leave them alone. There was a great deal of a talk about the mysterious death of the pilot. It was received as undoubted proof of the existence of mighty forces still unknown to us.

But the results of a thorough investigation by US authorities received much less publicity. The mysterious "saucer" proved to be nothing but a thin-walled plastic balloon made by US Naval Forces under the secret "Skyhawk Operation" project.

Such balloons could rise to an altitude of 30,000 metres. Meanwhile, Thomas Manthell pursuing it, forgot that he had no oxygen apparatus on board his craft.

We know of stories about encounters and even hand-to-hand fights with pilots of craft landing from other planets. They were shot at, but without success.

A saucer out down a tree on the Amazon River shore and disappeared in the turbid stream. It was never recovered. Another saucer glided over the earth like

an injured : . The and amost crashed before the eyes of witnesses. But "having spinout" several pieces of metal, it levelled out its course and flew off. Delivered to the police, the metal proved to be ordinary tim.

An abandoned silvery disc was found in the deep rock-coal seams in Norwegian coal mines on Spitzbergen. It was pierced and marked by micrometeor impacts and bore all traces of having performed a long space voyage. It was sent for analysis to the Pentagon and disappeared there.

Nothing but a saucer put out of commission a high-voltage power transmission line in 1965 and thus plunged several large American cities into darkness for six hours.

But the most thrilling masterpiece of this sort was probably the "Interview w. a Man from Venus" published at the close of 1967 by the West German Stern magazine. This materialized blue-eyed "superman", a version of Nietzsche's "blond beast", proved to be a secret service agent of the Pentagon. He was 190 cm tall, spoke excellent English (it was English indeed!) and could breathe freely in our atmosphere without any devices. His modest fibre suitcase contained an unusual silvery suit, flexible like silk and so hard that a diamond drill broke off it.

The man from Venus said that he could walk freely in such a suit over the surface of the hottest stars, ignoring all powerful gravitational fields.

Maybe these "facts" will do?

How Can They Be Studied?

It is easier to ask this question, than to answer it. These flying saucers—they are like Our Lady: they appear to those who believe in them. And they persistently fail to show themselves to air observation posts, meteorologists and astronomers, i.e. precisely to those who can give us accurate information and trustworthy descriptions of a flying object.

Experiments that do not repeat themselves, or the chance appearance of a phenomenon always either handicap the possibility of investigation considerably or exclude it altogether.

Nowhere in the world is there EVEN ONE trustworthy stereoscopic photograph making it possible to trace from two points simultaneously the outlines of a solid flying object clearly. All photographs that exist have been made with single-lens cameras and always leave a margin for doubt.

A series of such photographs amazingly resembles a straw hat with a black silk ribbon, thrown into the air. Others undoubtedly prove to be internegatives obtained from two combined slides, for instance, that of a landscape and that of a strangely designed craft drawn on white paper. Modern photographing techniques allow photographs to be produced which no expert will ever prove to be counterfeit. They are preal. But they do not show strangers from space; they show quite ordinary earthly objects unexpectedly foreshortened -- pots, pans, plastic toys, and the like.

Are there photographs which evoke no doubts whatsoever? Yes, there are. They always show shining objects of a circular or oval shape with vague outlines. Most

likely these photographs show ball lightning. Incluentally, the nature of the lat has not been fully elucidated yet either, due to the vagueness of the place and ti of its formation. However, no one ever thought of ascribing a cosmic origin to it

Even with a superficial analysis, mysterious flares on clouds proved to be reflections of electric welding, warning lights of sirplanes in the area of sirplanes or distant summer lightning. And the November 1967 "saucer" over Sofia proved to a high-altitude NATO reconnaissance balloon.

Among the most serious works devoted to an investigation of the problem, there are two which ought to be mentioned. One of them is the book "Flying Saucers" by Donald Menzel who explains almost all cases of their appearance by disturbances in the Earth's or Sun's atmosphere. Our planet travels in the upper layers of the Sur atmosphere where clots of high-temperature plasma are moving freely.

The other is a book by Frank Edwards. It is a collection of statements, notes and records of eye-witness testimony classified into several sections. True, Edwar often qualifies his source as a witness who did not wish to have his name mentioned but who may be fully trusted, or that the trustworthiness of the witness is confirmed by numerous of his countrym., but he cannot mention his name so far for a number of reasons. That's not very convincing, is it?

For Whom Is It Not a Myth?

They are those for whom science is a business. Taking advantage of the lively interest of people for everything that transe and unusual, numerous lecturers in the West appear before audience the poorts and stories, invite eye-witnesses to such lectures, and demonstrate probabilities. Most of these lecturers are nothing but ordinary quacks. True, there are people who are sincerely convinced in the truth of what they are talking about. They strive to draw the interest of the public to certain phenomena but, we are sorry to say, there is more harm than use in that.

The Americans Lesly and Adamski are the most outright frauds among them. Using their "good friendly relations" with strangers from other planets, the enterprising businessmen "visited" Mars, the Moon and Venus, learned from our cosmic neighbours to treat by simple and accessible methods such diseases as cancer, glaucoma, hypertension and others which afflict the human race. Their lectures, motion-pictures, books and medical practice have brought them many hundred thousand dollars out of the pockets of trusting listeners and patients already.

We may trace a clearly defined regularity in the appearance of large numbers of flying saucers. And, strange as it might seem, this regularity is closely connected with earthly events.

The first "cycle" of four years began in 1947. The number of saucers always grows sharply on the eve of presidential elections in the USA. This is difficult to explain. Maybe people on other planets lay bets as to who will win in the next elections — the republicans or the democrats. Perhaps, these saucers appear in order to divert the voters' thoughts from the again non-fulfilled presidential programme and promises to make the country a "great" and "prospering society.

There is another cycle. True, it is not determined by time. Saucers flooded the earth's atmosphere in 1951, in the months when the American troops were waging a ruthless, annihilating war against the Korean People's Democratic Republic.

Tune . ie have

The next invasion of saucers was in 1965-1966, when 35 American advisers in South Vietnam were quickly replaced by half-a-million-strong army equipped with the latest arms and intending to rout the National-Liberation Front within two weeks and when the President of the United States of America, without declaring war and in violation the constitution of his own country, gave the order that the peaceful population of North Vietnam be subjected to brutal bombings.

In short, when newspaper circulation drops, when readers get tired of economics and politics and when they are to be diverted from "irrelevant" questions, the Western businessmen resort to three reliable, "always fresh" sensations: Flying Saucers, the Sea Serpent (sometimes it is substitued by the Loch Ness Lake monster), and the Snow Man.

It is much nicer to read about systerious craft from Venus than to think of the future, of the wage freeze, of growing prices or unemployment. Statesmen in imperious countries resort to this "information" quite deliberately. For them the flying saucers are not a myth, but a well-camouflaged means for misinforming the people. And nothing but that.

(Moskovsky Komsomolets, February 16. In full

THE END

UNIDEN" ILL

FLYING OBJECTS

First the factor several striking and reliable t FO abservations, and then, succlasions.

First Account

THE PLACE of observation is Kazakhstan, the field ramp of a geophysical expedition from a Lenburgas' research incliner. The nearest populated faculity, Koktal, is 21 miles away. The time of observation is August 16, 1966, about 11 P.M. local time.

According to Master of Geology and Mineralogy Nikulai Sochesanos, the campchiel, a strange, funtions body sublent appeared over the mountains on the costern Jupe of the valles. It was moving from moth to south, and its visible diameter was one and a half times longer than the Moun's,

A few seconds inter the body disappeared behind a resultain top, reappeared and benefit switheast, keeping constant speed and height above the Earth. The mysterious object was benealing and bright, the edges being secondary bear luminous than the center,

The hode described an are in the sky and disappeared behind the mountains, leaving no i trace,

The unidentified flying object (CFO) was observed by eight scientific workers, members of the peophysical expedition.

Second Account

On July 26, 1965, Latvian astronomer-Robert Vitolaick, Yan Melderia and Esmeralda Vitolaick were studying assettiuend clomb at an observation station at Ogra-M 9:15 P.M. they noticed an unusually bright star moving deads in a westerly direction, Looked at through bimoculars with a sugnification of eight diameters, the "star" resolved itself into a small, flat speak. The belonges then disclosed the following insertible picture.

In the heart of a broochaped disc, which the astronomers estimated to be about 325 feet across, was clearly exident a thickness part, a small sphere. Around the disc, at a distance of two diameters, were three apheres resembling the noe in the center. The spheres shoult existed around the disc as the entire valued that the spheres begon to move any from the disc, as if receiving in different discriment, The sphere in the center also left its place and moved away, Finally at 10 P.M. all these phrincing careabl green besties near as far and that the attenuence lost eight of them.

This strange picture was observed in the morthwestern part of the sky at about 600 degrees above the horizon. The astronomore estimated that the enigmatic objects were about 60 miles above the Farth.

Third Account

A long radiogram arrived at the office of the magazine Smean, for which I had written an article on UFOs. It was went by First Mate Barbarbin on behalf of the crew of the Soviet whin faboral. On August 2, 1967, at 13:30 P.M. Moreow time, while consing the Norweglan Sea in a notesty discretion. Inhersh pallors witnessed the musual phenomenan, said the sadia-arms.

There were there of as in the cabin-Captain Markov. Senior Engineer Isanov and uspelf. Sproper, noting a no date, reported a strange phenomen, In the sky. We can to the bridge and saw a sphere-like which next marine another ed.

whitch spot moving continuard.
"A few uninetes later a bright spot flored up high in the chy. For a couple of secondir rushed leadings from west to cast at an angle of 45 degrees to the Earth, getting much larger. Suddenly, it came to a stop and with a play of bright rainbow colors tyellow predominatings began, throwing off sparks and became encoloped in a white shound.

"There again the sphere-like white nebula logan moving south. The procedure was respected from times. On the fifth and last time the sput's behavior changed, it shapped mid-was, ingued over and assumed the shape of an egg with the thicker end up. Then a powerful white jet squitted from the lower and, after which the 'egg' gren pale, became enveloped in white miss mul, with its white tail, began to lead enuther and.

All this strange exhectal articity was similar

Fourth Account

Not one but several reports came from astronomers at the Mountain Astrophysical Station, USSR Academy of Sciences, 12 miles from Kishmodsk, Caurasus.

In July 1967 the station received letters from heal non-papers reporting the flight of a strange residinh crossent nervos the sky at 9:20 P.M. on July 17.

In the very early nonening of July 19, 1967, automoney H. I. Poster, who was observing the Moon at the Moon at the Moon against a clear starts sho at 25th A.M. Moscon time. A white cloud appeared in the northeast at an elevation of about 20 depress, its disurders upo twice as long as that of the Moon but its none massecoral times less leight.

The cloud itself had a dense miths white taker, with a reserved nucleus elgarly discremible near its methern end. The cloud expanded and green paker, A few minutes later the white signal dispersed completely, but the reddish mucleus remained. Toward days break it had its suffices and then disappeared. Photographs showing its charges were taken.

At \$1.30 P.M. on topost \$1, 1965, at the same Mountain Station astronomer travelly Seasons observed on unfamilier fixing object. It was shaped like an asymmetrical expects, with its remove while torond in the direction of the monoment. Nation, Injuly tominous risks monoment. Nation, Injuly tominous risks hope resembling the rendensesting trail of a jet plane followed behind the hopes of the converse. Its diameter was translitized that of the blass, and it was not as bright. It was tellow with a redshirt time.

The abject was fising horizontally in the northern part of the sky, from next in earl, at about 20 degrees above the horizon, it caneved the distance from Ursa Major to Carol. FEBRUARY 1968

Assistant Professor,

Maccow Aviation Inclining

opera in half a minute. A helple star of the first magnitude was cooring at a constant distoner ahead of the exercent.

As it moved anay from the absences, the exercise dutables, turned into a small disc and then instantly disappeared,

The experience object was seen by 10 of the station's scientific workers. It was also absorved in Kishmodek, Aerogaling to Sasensor, the experent was 12 miles augs, and it was no less than 500 feet person.

Optical Illusiant

Let us step here and draw some enactusions. Even if all the LFQ exidence amounted to mo more than there have accounts, it is clear that the exidence exists. The fact of the matter is, however, that others thousands of one holes above above here been desumented in the past 29 years. They come from degrees of countries and virtually every country of our planet, including the Arctic and Autaretic, The LFQ phenomenon is non-wide-precal and upputarly accepted to be dismined lightly.

. A proving number of serious scientists are not estisfied with explanations characterizing the sightings as visual aberrations, it goes without saying that the phenomenous streat, and will unfortunately continue to, all onto of publicity-seekers. But we do not stop using mone because there are counterfeiters. The lack of science is, previsely, the abligation to distinguish between the false and the true.

Thus, if science cancilless flying causes a hallocination, it still must explain the cause of this global perchir illness. That more not be no difficult to establish so the true nature of LFDs.

The well-known American astrophysicist Donald Meazel and that Bing assers are optical phenomena in the Earth's atmosphere. Because of Professor Meazel's releasilie prestige the explanation is generally accepted, fluit those not hold water. As some as me gen an from this generalization to concrete interpretations of concrete observations. It has succeed themselves to optical phenomena of the mineral control of the Meazel of the Meaze

The sparseame of Little is almost always nied in a huninercore of air and the formation of an atmospheric plasma. This face in the fracie for the "planta" by gutherly of LTDs as premujations of simply ome of the built lightning to per flut this explanation there not hadd up either, Rall light. ning is always a thumberstoom product, and the approximent of 1 file has no relation to neather. Ball lightning dismeters as a sule run lour to five looken, no larger; the diamstern of fixing disea are tens and even hun devils of times that sire. The behavior of I I'de, their shapes and other physical proper retire are quite different from what we have of ball lightning.

Saurers and Balle

To find a clue to the nature of 1 lits, we would shall all the expects on these suspicing and, to me which, real object, finh a wise, the analysis will present the truth. What is, however, clear already is that 1910 phenomen.

cann can be objectively analyzed and classified. The EFO classification adopted by foreign investigators is also confirmed by Soviet observation.

Its das, when observed from Earth or plane, I I the appear as bright diese with a metallic tings. Asoletant Professor Vyacholas Zolicas shorted such a fixing saurce for 1961, alone Hodopovo, from a TI-IDI alreaft making a wheelubel light. The hope laright metal dis still under the liner's hells, made a turn and at some distance took a course parallel with the aircraft. A hulging over recentiling a ratio could be seen in the heart of the dies. After Roing aboutside the plane for occord second, it sweeterl along the and disaggenered.

A similar object was observed by geodetic astronomer. Lyudnila Techtanomich in the summer of 1963 near Nakhumi. Caucasus. The UVI made a suit monetary over the cauthen headed for the mountains. The astronomer was, however, able to see that the control proteuding part of the disc had holes which occurred to be ill from the invite.

UFO movements are peculiar. Sometimes they have over the earth for tens of minutes, In Sight they can develop incredible speeds and accelerations.

It 9:15 on the evening of June 17, 1966, on the out-little of Enlists a team of gen-physicist from the Institute of Old and fice Industry, Volpopsul, led by V. G. Krabes, nations a publish object musing across the sky, It was shaped like a small disc.

Sublents the look began to fall aniftly along a helical trajectors, its reddish cohor changing to bright a bire-like. Then there was a not of fare, and instead of the fools a bright-like round should appeared, it quickly operations and underly anal.

Beyonding on the victing angle, flying discs look flattenest or eigen-shaped or spherical. In some cases a LEV appears as a resease, turning late a disc before your see.

The belief that I'l'thin real is also horse out in the fact that these enigmatic objects are not only visible to the maked ere, but have distinct images on photographic plates and are recognited by such importial "nit-

hir Force Major Rablahos, on a night mission above, the Orlessa Region on April 3, 1996, entired on the servers of his plane's rodar a stronge object which was also spatisfied by protond-based radar units. Within 15 minutes the object dropped from 31 to 18 miles, in the next quarter of an hour to 15 miles, and in the next 10 minutes to 11 miles. The 14 O remained unithositied.

Maneuver and Pursuit

The well-known Societ piled, third marigative of Societ polar artistion Valentin Maraton, described one of his recounters with flying diseas.

"In 1956, engaged in strategic for seconnational r in a TI-1 plane in the area of Cape four Greenlands, we dropped down from the climbs to fair to the mele to fair weather and emblents no sue ne guirous flats guirfl namafun un fre it particle parallel to not course. It tuded some much the a large productional has with water pulsating sulpre. It first he thought is an am Imerican aireraft oil an embroom de. sign and since we did not want to encuente it no nent into the clouds again. After no had House for 14 minutes top and Hear Island, the hands found to they the bound some in and on one portrible we am some again that came unknown esalt. Making my our minds to we it at a lone quarters, we shanged out source Jamesons descripts all negations deposits only he sanctions to very our gainstains mmenter Aben we changed our course, the unknown fixing marking followed suit and houp one to bileted become

nameline of the filter standard the Clark Parish and American from the course of the c

in the blue sky. We control on period, supercine ture, whose or purifiche on that dice, har did us see an exhaust passe us confensation trail. It flex at what seemed to us an impossible speed."

No Projudirea

Intil recently no estentific study of LTTs has been made in the Societ L'nien. More then that, the prevailing and, in my aginting their tien was that LTTs are remnon optical phenomena in the Earth's atmosphere. There was no collection of LFO observations, and the general impression was that flying source are fontasies. The situation non in changing.

In 1966 the Nauka Publishing House of the 1991 tradems of Sciences to echeduled to being out a bond titled Populated Outre v. olked by Aradembian Burje Konstan. time. Vier President of the INA Academy ed Sciences. The distinguished Societ an foreign contributors include: Arademirlans Vietne Ambartenmean, Alexander Oparin, Mexander Imshenetsky. Andrei Kalapage Corresponding Members of the USSR Acadn of Science Vasili Kupresich. Alexander Vologelin, Issif Shilosoky: and eminent forrien erientiete Molein Cofein, William Pick. ering. Frank Salisbury (USA), Norman Piris, Bernard Lenell Great Britains, Hans Fremlenthal + Netherlands+, Giuseppu Piccordi . that and many others.

The ambidops will have a special meeting decorate to the UFD problem, with contributions from American scientists Joseph Hynch, Lance Melbonchi, Lock Valley, and Frank Salisbury, articles to Societ writers and UFD absentiations made in the Societ Union.

Societ observations of LPOs, like those I vited earlier, were not taken from a poptematic collection of information of this kind; they were quantaneous represent to my article in Success, This last a arrante the conclusion that there have been many more LPO short attention to LSOR, We have already collected some observed of well-bourneited reports and as counts.

In May 1967 a sponsisting group of orientide, the military, writers and public figuresises to form an uncollectal body whose purpose it mould be to conclust a preliminary wientile functional or of the forest present included Professor Heinrich Ludnig: Doutors of wiener Nikolai Zhiroy and Igor Bestanber-Luda; chief maxigator of Smiet polar aciation Valentine Alkurator: Generals Profiel Stolyator, Leonid Reiner Georgia Verrand Georgi Zeraklic, twice Heros of the Swiete Union Grigori Sicker, Master of Swiene tengineer, pet Ilegeor of the Swiet Union obserut Yelaterina Byalona and Natalia Krastona.

The organization, set up October 1967, is called the UFO Section of the All-Linion Communities Committee, with headquarters at the Central House of Atlation and Communities in Moscon, Air Force Major General Portici Stolicator, was elected chairman of the section.

These of se a letter participating in this was and eviting undertaking have an assistance program of a net alread. The treatory will be to organize the cultertion of reliable industriation on 190a. That will be alone at the outer be the existing systems of adjunctional, meteorological and grouphy in all observations, and the raising systems of sidillan and the raise including out of sidillan and the letters included on a sidillan alignest and the letters included on the letters. If these arganizations can make 190 is increasing a with equipment was available.

In the design slage are special desires for photographing 1 12th and recording the radiation and magnetic disturbances which ther may be propossible by.

Surete from fither Warlds?

The prescribed observations will expre to shock hapsahouse. These hapsahouse should not, in our equinions attempt to explain the matter of LFMs in terms of familiar photons.
 trea. Imiging by relieve suspectors, matter has some in chore by me beer two, and not small be train for prehaps a radical representation of solure.

The hypothesis that ITOs originate is taken woulds, that they are flying stall from planets other than Earth, merits the most sections examination.

Observations show that L'fits I charp "perailds." In a group formation flight they maintain a pattern. They are most often equated over airfields, denois stations and other very new engineering installations, the encountering aircraft, they always oranemeer on as to avoid direct contact. I considerable flot of these occurringly intelligent actions gives the impression that I We are investigating, purhaps were ecomouliering.

Cuclously enough, the number of L'FO of a creations inverses as Mass approaches the Earth, Is that justs enioritous?

Some people think that UPDs have appeared in the Karth's atmosphere only during the year two iterative. This is not the case. The UPD phenomenon has been miserved throughout the history of markind. There are motival and arrived reports strikingly similar to ours.

Among the earlier 1 fth reports, as on example, may be the well-distincted absorptions of a "large accor" in 1222 and a "possession of ladde," in 1213. These reports only man in terretain of the configuration.

The most remarkable LED phenomenon is the famous "Tungud's meteorite." In second years Soniet scientists have established that the Tungucky explands in had every parameter of an air mulear blast. The USSR deadons of Sciences dequets (Volume 172, Nov. 4 and 3, 1967) have sludies by Beard Zohotes to prove that the Tungucky enablement has the a meteoritie on a suit.

In the summer. (1966) the Joint Institute of Nuclear Research at Dulma published a study by Aladianic Michaelon, who concludes that the Tungucha blast left considerable residual radioarticits. Finally, as recently as 1966, after analyzing the sum total of educations on the Tunguchy leady's flight, this writer showed that before the blast the Tunguchy leady is possible to return to a second of the atmosphere a tremendous are of about 375 miles in extent in action the, that in carried out a manuser.

All three new results narrout the conclusion that the Tungush, body seems to have been an artificial flying reals from some other planet.

Should this lee finally confirmed by insecting the same in progress, the significance of the Tunguely diseases would be investmable.

But this, inchlentally, will pose men probbens. If we are indeed being similed by resistance from other planets, what to their purpose? Why are they so studiously assisting any direct contact? In their mean inhibit, the result of an high a level of interdequence that they study so from that "height" just go we had upon and study ante? By is there eight the provided to common understanding since we are hearn in the same Universe and obey the same fans of nature?

hen there will be many questions, but all are in the distant future, there study of 1 life man had to quite different combinions and present mankind with quite different problems.

The important thing non le for me le diseard any presenceised notions about 11th and to segamine on a global scale a raim, sensation-line and stricts admitted outle of this strange phenomenon. The subject and aims of the investigation are servinus that thes justile any efforts, it prove nithout saying that international empression is sital.
